

OUR LORD REIGNS... even in the darkest places.
And the Greatest Victory of LIFE over death is
present there, also...

To all of you reading who are pro abortion, this is
from the Cleveland Clinic website
my.clevelandclinic.org

*At 4 1/2 months (the age up to which The
Northeast Ohio Abortion Center kills babies) a
baby is fully developed. He or she is 6 inches
long, has ten fingers, ten toes, fingernails and
fingerprints, facial features, hairs on their head,
a functioning brain and a complete nervous
system. They suck their thumb, make facial*

expressions, respond to the sound of their mother's voice, and even sense light.

And yes, during their killing they struggle to save their life.

It is estimated that there are on average 35 couples waiting for every newborn to be adopted. An expectant mother could literally look through a catalogue, select one of these couples, and meet them before making her decision. And then that couple would literally pay for everything that young mother could need during the few remaining months of her pregnancy. So "the life of the mother" is not the issue, money is not the issue. Only convenience...

think about this...

Pat
